

# SEPARATIONS THUMBNAILS

FOCUSED • POWERFUL • EASY-TO-USE

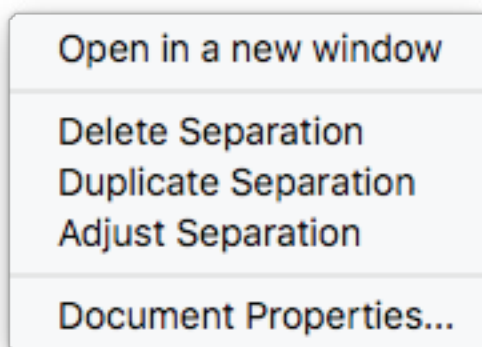

The Separations Thumbnail Feature is available for both the Spot Process and PDF engines and displays and off controls of individual separations..

The Separations Thumbnails represent each separation channel of the file separations. You can right click to open an options menu, or click the 3 bar icon.

Mouse over a thumbnail to reveal a Quick Menu and Click the Menu. You can also right click to open the same available options. Below are the Separations Thumbnail options:

The options allow you to Open the selected channel in a new Window which you can drag to reposition. You you Delete (trash) the selected channel, or Duplicate it to use as an additional Separation which can be renamed and edited.
