

# LICENSING MENU

FOCUSED • POWERFUL • EASY-TO-USE

The Licensing Menu provides the options to Purchase and Activate a Serial Number.

These two options are available while in the TRIAL mode. The Purchase Menu will automatically launch the [Solutionsforscreenprinters.com](http://Solutionsforscreenprinters.com) web site to make the purchase. The Activate Serial Number option allows you to ENTER the Serial Number received after purchase to manually activate the trial into a purchased version.

The Serial Number entered will be specific to the License type you purchase (i.e. Premium One Year, or Advanced License).

## TRANSFER ACTIVATION

After you are an activated user of a License, the Menu options under the Licensing Menu will automatically present the option to TRANSFER Activation. This feature allows you to remove the serial number from the software on a computer, allowing it to be used to Activate the software installed on another computer. It is important that the computer you are moving the License to is part of the list of supported Operating Systems.

The Advanced Software License has a specific Operating System for installation.
