

NEW RELEASE DETAILS

Printer Support Addition:

Canon Pixma Pro-100 (Desktop)

Spot Process™ Engine Features:

- secondary custom Underbase options offer a NEW and amazing ability to choke halftones
- PressFit™ power merge and press layout technology added to the Spot Process Engine

Print Commander™ Features:

- expanded gallery of registration mark styles, control over mark weights and multiple mark layout templates to meet the varying needs of screen printers

User Interface and Work Flow Enhancements:

- expanded Preference options allow users to setup the app to default to their standards
- files saved retain all custom settings that are auto loaded when a file is reopened insuring perfect film matching to previously printed sets of film
- upon file opening users select screen resolution options that can speed up file processing – Freehand engineered automatic file printing to maximum printer setup resolution on every job – the higher the print resolution selected the greater the print results every time
- NEW modernized sliders and buttons for easy navigation
