

Not automating color separations with NXT?

You're not just behind—you're burning through cash that could be fueling your growth.

Separation Studio® NXT

Its superpower is efficient color separation automation AND post-separation control.

Empower even small press shops to deliver great prints with fewer screens.

**Creative
chaos**

Not on your watch...

- Seamlessly fits into your creative process using art built with Adobe, Corel and Affinity Designer.
- Has industry-focused tools because, let's face it, our industry is often overlooked.
- Controls your operational costs while helping customers get exceptional prints—within their budgets.

why
NXT?

Instead...easily take the tedious out of your separation workflow. Turn your time into profits and print like you have a big press. Trust in NXT for flexible, money-saving, and easy-to-manage daily production of all of your designs. Stop wasting hours fixing client art or struggling without the right tools. With NXT, you get bigger profits, better prints, and less wasted time. Say goodbye to costly manual errors.

A six-color press is NOT a problem...

Sep Studio NXT gives you total control over pre-press, with features that streamline color management and merging of separations to reduce press screens. It's a win for client budgets and a boost to the bottom line for both small and large press shops. **PRINT LIKE YOU HAVE A BIG PRESS!**

Include a Sep Studio NXT license or two into your budget so your customers can get their best looking prints while staying within their budget.
